

Inspired by the untamed spirit and dynamic lines of luxury SUVs, its bold silhouette channels a sense of power and freedom. The wraparound backrest design delivers a strong, cocooning embrace.

Blending comfort and uninhibited imagination into the pursuit of the executive chair, it is equally at home commanding a refined workplace or venturing into ambitious horizons. From poised leadership to fearless exploration, it empowers you to express a sharp, liberated individuality.

Design Concept

**SLOW REBOUND SPONGE PILLOW, FOR
PRECISE ADJUSTABLE SUPPORT**

Ergonomically designed to follow the natural curve of the lumbar spine.

Featuring a 4cm height adjustment range, it ensures continuous lower back support without suspension, accommodating users of varying heights with tailored comfort.

CH 38

— "COCOON"-SHAPED WRAPPED STEEL
FRAME CHAIR BACK PROVIDES STABLE
SUPPORT WITHOUT BURDEN

The sculptural steel frame forms a supportive wraparound structure, delivering stable support without added strain.

Designed with ergonomic contours that naturally align with the L1–L5 lumbar region, the backrest provides comfortable, continuous support to the cervical spine, thoracic spine, lumbar spine, pelvis, and coccyx. By closely following the body's natural curves, it helps reduce spinal pressure and accommodates a range of body profiles with balanced, tailored support.

**4-LOCK TILTING MECHANISM, FREELY
TILTING WITH COMFORTABLE ADJUSTMENT**

A high-performance mechanical base allows up to a 120° recline with four locking positions, offering smooth, controlled adjustment to suit moments of focused work or brief relaxation.

**ONE-PIECE DOUBLE-ARMREST OPTION
THAT COMBINES STYLE AND PRACTICALITY.**

A seamless double-armrest option that balances refined aesthetics with everyday functionality.

Crafted from aluminum alloy in a one-piece construction, it offers versatile configurations—effortlessly shaping a well-composed and contemporary office setting.

Modern design

KINGSTON

Headrest

High-resilience foam core with smooth rebound performance; height adjustable up to 4 cm.

Armrests

Integrated aluminum alloy armrests with upholstered leather surface; refined in texture, comfortable to the touch, and detachable for flexible configuration.

Mechanism

Four-position locking tilt mechanism with a maximum recline angle of 120°.

Castors

60/25 PU silent universal castors for smooth mobility.

Backrest

“Cocoon”-inspired wraparound design with high-density molded foam for balanced, enveloping support.

Seat Cushion

1.2 cm reinforced seat board with high-density molded foam ensuring lasting comfort and shape retention.

Gas Lift

85 mm adjustment travel with 80 mm recessed gas cylinder.

Base

340 mm aluminum alloy five-star base.
